

# Ginger Science UV Filter Study – Protocol

MC1R Data Foundation

**Version:** 1.1 – July 2025

## 1. Overview

The Ginger Science UV Filter Study is an independent research initiative designed to assess real-world experience and ingredient tolerability across globally sourced sunscreen products. It is part of the Ginger Science Project, which aims to collect structured health and consumer data from redhead and fair-skinned populations historically overlooked in dermatology and clinical research.

Redheads are known to have increased risk of skin cancer, and the need for sunscreen is particularly important in the population. The lack of data about how redheads interact with SPF compounds is a material gap in clinical knowledge. This project will help include MC1R-variant data be included in future research.

This first product cohort evaluates six EU- and Asia-compliant sunscreens labeled SPF 50 or higher, distributed in brand-blinded microdoses for structured user review. Participants are not compensated but receive unique digital artifacts to mark their contribution to community-owned, privacy-respecting research.

This cohort is limited to participants in the United States, due to the ready lack access to modern filters in the country. The FDA has not approved a new sunscreen compound since 1999. This study collects real-world evidence about how redheads interact with sunscreen in order to supplement consumer, regulatory and business decisionmaking

This protocol outlines the scope, data practices, and governance of the study.

## 2. Study Goals

- ☐ Assess texture, finish, reactivity, and user preference across six sunscreen formulations
- ☐ Record real-world context of use (climate, application timing, layering, etc.)
- ☐ Build a publicly accessible, machine-readable ingredient dataset linked to participant reviews
- ☐ Increase inclusion of redhead and MC1R-expressive skin types in community-anchored wellness data

Ginger Science SPF Research Registry – Informed Consent Form v.1.0

Protocol Ref: GS-SPF-01

Last updated: July 2025

### 3. Product Cohort

Each participant receives:

- ☐ Six **4ml color-coded, brand-blinded sunscreen samples**
- ☐ INCI ingredient lists for all six products (accessible via QR link)
- ☐ A unique survey & review link (unlocked only after informed consent)

Products represent:

- ☐ **2 Korean hybrid sunscreens** (chemical-mineral blends)
- ☐ **Japanese water-gel sunscreen**
- ☐ **Canadian broad-spectrum SPF with Mexoryl**
- ☐ **EU/US SPF 100 formulation with legacy filters**
- ☐ **Premium ultralight mineral (zinc/titanium) sunscreen**

### 4. Participation Instructions

Participants must:

- ☐ Be age 18+ and based in the U.S.
- ☐ Self-identify as having red hair, MC1R expression, or extreme sun sensitivity
- ☐ Consent to participation through a plain-language consent form
- ☐ Test all six samples over ~7–10 days, preferably in morning-use scenarios
- ☐ Submit a structured review via provided QR form (includes short answer & multiple choice)
- ☐ Samples are sent unbranded with ingredient lists. Participants are informed of the brands of each product after submission of review for that product.

Optional:

- ☐ Utilize UV stickers packaged with the sample kits.

Ginger Science SPF Research Registry – Informed Consent Form v.1.0

Protocol Ref: GS-SPF-01

Last updated: July 2025

- ☐ Submit images showing how the sunscreen appears on skin
- ☐ Claim MC1R reward token

## 5. Data Types Collected

### 5.1 Survey Responses

- ☐ Frequency of use
- ☐ Reported side effects
- ☐ Sensory feedback (feel, scent, finish)
- ☐ Climate context
- ☐ Willingness to repurchase or recommend

### 5.2 Product Metadata

- ☐ UV filter types
- ☐ Region of origin (e.g., Korea, Canada, EU)
- ☐ Product class (hybrid, mineral, gel-based, etc.)

### 5.3 Participant Tags

- ☐ Fitzpatrick skin type
- ☐ Hair/freckle pattern
- ☐ Region/latitude (optional)
- ☐ Dermatological history (optional, de-identified)

## 6. Data Infrastructure

### 6.1 Storage & Structure

- ☐ Pseudonymized submission saved off-chain
- ☐ Select reviews parsed by MC1R BioAgent for summary/metadata aggregation
- ☐ IPFS & GitHub used for public documentation (e.g. protocol, INCI sheets, consent form)
- ☐ Process Control NFTs contain only cohort metadata, no identifiers

## 6.2 Access & Revocation

- ☐ Participation requires opt-in via consent form
- ☐ Consent may be revoked via email or wallet signature
- ☐ Data may be downloaded by participant upon request

## 6.3 Interoperability

- All data designed to comply with emerging decentralized health data standards
- Metadata published under open license for academic/community reuse

## 7. Consent & Governance

- ☐ No wallet required to participate
- ☐ Consent form is required before accessing the survey/review form (See Exhibit A).
- ☐ No private health information is stored or sold
- ☐ Project governance is overseen by the MC1R Data Foundation core team and published publicly via GitHub

## 8. Ethical Framework

- ☐ GDPR-aligned privacy architecture
- ☐ HIPAA-adjacent safeguards for sensitive questions (fully optional)
- ☐ Informed consent with optional conditional re-identification enables incentives
- ☐ Incentives for this project are early access to other projects, and non-monetary

## 9. Next Steps (for Participants)

- ☐ Scan the QR code to view the INCI ingredient list and review products
- ☐ Use the samples over the course of 1–2 weeks
- ☐ Log your experience in the review form
- ☐ Follow @GingerScienceHQ for future cohort releases and data summaries

## **Exhibit A. Informed Consent**

### **Ginger Science SPF Research Registry Informed Consent**

The Ginger Science SPF Research Registry is a project of the MC1R Data Foundation that collects information from participants regarding sun protection product use, experiences, and preferences to better understand and address the unique sun protection needs of individuals with red hair and the MC1R genetic variant.

Registries collect and store data about specific characteristics from individuals with shared traits or conditions. By participating, you contribute valuable insights that help researchers and product developers create safer, more effective sun protection products tailored specifically for redheads.

People with the MC1R variant have unique sun protection needs due to increased sensitivity to UV radiation. Today's technologies enable us to harness this information, leading to better research outcomes and improved products.

#### **How does the Ginger Science SPF Research Registry work?**

De-identified information regarding your sun protection product use, preferences and experiences will be securely stored and used for research and product development purposes. The registry aims to improve understanding of sun protection effectiveness specifically for people with the MC1R gene variant. Additionally, this registry addresses practical needs, such as improving product recommendations and personalized skincare advice.

Researchers and product developers will access the registry to gather accurate data on sun protection usage, efficacy, and preferences among redheads. Researchers seeking participants for relevant studies and product testing will also use the registry.

All data will be stored on secure, encrypted systems and access will be limited to authorized personnel only.

There is no cost to participate in the registry.

#### **By consenting, I acknowledge that I have read and understand the following::**

- I understand my participation is voluntary, and I may withdraw at any time.
- I understand that efforts will be made to protect my privacy. My personal information will be securely stored using anonymized codes. However, there remains a minimal risk my identity could become known.

- I agree to be contacted periodically by the registry to update or verify my information.
- I consent to sharing my de-identified data for research studies and product development efforts related to sun protection and skincare.
- I understand my de-identified information may be shared with other reputable skincare and dermatological research databases.
- I acknowledge I may not directly benefit from participating, and my data may be used broadly in research and product development.
- I understand I may withdraw my consent at any time, although data already included in ongoing research or product development cannot be removed.

### **Optional: Consent to Conditional Re-identification**

As part of the Ginger Science SPF Research Registry, your information is stored in a de-identified format. This means we remove personal details so that your identity is not linked to your responses in the research database.

In some cases, researchers may want to follow up with participants to share findings, offer new research opportunities, or provide personalized insights. To make that possible, we ask for your **optional consent** to allow **reidentification** of your record **under specific conditions**.

#### **By opting in, you agree to the following:**

- I consent to my de-identified data being re-linked to my identity **only by authorized registry staff** under secure and limited circumstances.
- I understand that this reidentification would be used **solely to contact me** for follow-up research, personalized feedback, or product testing invitations.
- I understand I may revoke this consent at any time by notifying the registry.
- I understand that my contact information will not be shared with third parties without my explicit, additional consent.

There are no penalties for declining this option, and your data will still be fully included in the registry and used for research in de-identified form.

☐ **YES, I consent to conditional reidentification for the purposes described above.**

☐ **NO, I prefer to remain fully de-identified and will not be contacted for follow-up.**

I have read and understand this form, have been provided sufficient background information, had adequate time to ask questions, all my questions were answered, and I have decided to participate in the Ginger Science SPF Research Registry. I will receive a copy of this consent form.

### **Contact Information**

## Exhibit B Products

Brand Name	Ingredients
SKIN1004 Madagascar Centella Hyalu-Cica Water-Fit Sun Serum SPF 50+ PA++++	Water, Dibutyl Adipate, Propanediol, Diethylamino Hydroxybenzoyl Hexyl Benzoate, Polymethylsilsesquioxane, Ethylhexyl Triazone, Methylene Bis-Benzotriazolyl Tetramethylbutylphenol, Niacinamide, Coco-Caprylate/Caprates, Caprylyl Methicone, Diethylhexyl Butamido Triazone, Glycerin, 1,2-Hexanediol, Butylene Glycol, Centella Asiatica Extract(9,800Ppm), Betula Platyphylla Japonica Bark Extract, Ginkgo Biloba Leaf Extract, Camellia Sinensis Leaf Extract, Triticum Vulgare (Wheat) Sprout Extract, Medicago Sativa (Alfalfa) Extract, Brassica Oleracea Italica (Broccoli) Sprout Extract, Eruca Sativa Leaf Extract, Camellia Japonica Leaf Extract, Sodium Hyaluronate(10Ppm), Behenyl Alcohol, Poly C10-30 Alkyl Acrylate, Polyglyceryl-3 Methylglucose Distearate, Decyl Glucoside, Tromethamine, Carbomer, Acrylates /C10-30 Alkyl Acrylate Crosspolymer, Sodium Stearoyl Glutamate, Polyacrylate Crosspolymer-6, Adenosine, Xanthan Gum, T-Butyl Alcohol, Tocopherol, Hydrolyzed Hyaluronic Acid(Ppm), Inositol, Hyaluronic Acid(0.01Ppm), Pentylene Glycol, Ethylhexylglycerin
La Roche-Posay Anthelios Melt-In Milk Sunscreen SPF 100 (Face & Body)	Active Ingredients: Avobenzone (3%), Homosalate (15%), Octisalate (5%), Octocrylene (10%) Inactive Ingredients: Polymethylsilsesquioxane, Glycerin, Dimethicone, Poly C10-30 Alkyl Acrylate, Styrene/Acrylates Copolymer, Silica, Caprylyl Methicone, Acrylates/Dimethicone Copolymer, Diethylhexyl Syringylidenemalonate, PEG-100 Stearate, Glyceryl Stearate, Phenoxyethanol, Potassium Cetyl Phosphate, Tocopherol, Caprylyl Glycol, Panthenol, Acrylates/C10-30 Alkyl Acrylate Crosspolymer, Triethanolamine, PEG-8 Laurate, Inulin Lauryl Carbamate, Chlorphenesin, P-Anisic Acid, Caprylic/Capric Triglyceride, Xanthan Gum, Disodium EDTA, Cassia Alata Leaf Extract, Maltodextrin, Sodium Dodecylbenzenesulfonate
Beauty of Joseon Relief Sun: Rice + Probiotics SPF 50+ PA++++	Water, Oryza Sativa (Rice) Extract (30%), Dibutyl Adipate, Propanediol, Diethylamino Hydroxybenzoyl Hexyl Benzoate, Polymethylsilsesquioxane, Ethylhexyl Triazone, Niacinamide, Methylene Bis-Benzotriazolyl Tetramethylbutylphenol, Coco-Caprylate/Caprates, Caprylyl Methicone, Diethylhexyl Butamido Triazone, Glycerin, Butylene Glycol, Oryza Sativa (Rice) Germ Extract, Camellia Sinensis Leaf Extract, Lactobacillus/Pumpkin Ferment Extract, Bacillus/Soybean Ferment Extract, Saccharum Officinarum (Sugarcane) Extract, Macrocystis Pyrifera (Kelp) Extract, Cocos Nucifera (Coconut)

			Fruit Extract, Panax Ginseng Root Extract, Monascus/Rice Ferment, Pentylene Glycol, Behenyl Alcohol, Poly C10-30 Alkyl Acrylate, Polyglyceryl-3 Methylglucose Distearate, Decyl Glucoside, Tromethamine, Carbomer, Acrylates/C10-30 Alkyl Acrylate Crosspolymer, 1,2-Hexanediol, Sodium Stearoyl Glutamate, Polyacrylate Crosspolymer-6, Ethylhexylglycerin, Adenosine, Xanthan Gum, Tocopherol, Lactobacillus/Rice Ferment, Aspergillus Ferment, Saccharomyces/Rice Ferment Filtrate
ISDIN Ultralight SPF 50+	Eryfotona Emulsion	Actinica Sunscreen	Active Ingredients: Zinc Oxide (11%) Inactive Ingredients: Water, Diethylhexyl Carbonate, Dibutyl Adipate, Cyclopentasiloxane, Dicaprylyl Carbonate, Alcohol Denat, Cyclohexasiloxane, Butylene Glycol, PEG-30 Dipolyhydroxystearate, Nylon-12, PEG-10 Dimethicone, Dimethicone, Sodium Chloride, Phenoxyethanol, Distearidimonium Hectorite, Triethoxycaprylylsilane, Tocopheryl Acetate, Glyceryl Stearate, Fragrance, Bisabolol, Disodium EDTA, Ethylhexylglycerin, Panthenol, PEG-8, Tocopherol, Lecithin, Plankton Extract, Ascorbyl Palmitate, Ascorbic Acid, Citric Acid
Garnier Sensitive Lotion SPF 60	Ombrelle Advanced	Complete Sunscreen	Active Ingredients: Homosalate (15%), Octocrylene (7%), Octisalate (5%), Avobenzone (3%), Drometrizole Trisiloxane (Mexoryl® XI) (0.5%) Inactive Ingredients: Aqua, Silica, Styrene/Acrylates Copolymer, Butyloctyl Salicylate, Dicaprylyl Carbonate, Methyl Methacrylate Crosspolymer, Nylon-12, PEG-100 Stearate, Glyceryl Stearate, Perlite, Cera Alba, Ammonium Polyacryloyldimethyl Taurate, P-Anisic Acid, Behenyl Alcohol, Chlorphenesin, Disodium EDTA, PEG-8 Laurate, Phenoxyethanol, Sodium Stearoyl Glutamate, T-Butyl Alcohol, Tocopherol, Xanthan Gum Crosspolymer-6, Ethylhexylglycerin, Adenosine, Xanthan Gum, Tocopherol, Lactobacillus/Rice Ferment, Aspergillus Ferment, Saccharomyces/Rice Ferment Filtrate
Biore UV Essence SPF 50+	Aqua Rich Watery		Water, Ethanol, Ethylhexyl Methoxycinnamate, Ethylhexyl Triazone, Isopropyl Palmitate, (Lauryl Methacrylate/Sodium Methacrylate) Crosspolymer, Diethylamino Hydroxybenzoyl Hexyl Benzoate, Hydrogenated Polyisobutene, Bisethylhexyloxyphenol Methoxyphenyl Triazine, Palmitic Acid, Dextrin, BG, Xylitol, (Acrylates/Alkyl Acrylate (C10-30)) Crosspolymer, Dimethicone, Alkyl Benzoate (C12-15), Glycerin, Glyceryl Stearate, Propanediol, Glyceryl Behenate, (Vinyl Dimethicone/Methicone) Silsesquioxane) Crosspolymer, Cetanol, Agar, Sorbitan Distearate, Isoceteth-20, Polyvinyl Alcohol, (Dimethicone/Vinyl Dimethicone) Crosspolymer, Stearoyl Glutamic Acid, Arginine, Potassium Hydroxide, Sodium

	Hydroxide, Royal Jelly Extract, Hyaluronic Acid Na, Phenoxyethanol, EDTA 2Na, BHT, Fragrance
